Conference at the Haus der Wissenschaft underlines necessity for action and more research

Both social as well as environmental policy research use the notion of sustainability. However, they use it in different forms and with different content. The yet only partially discernable effects of climate change, however, impress the obligation that really “sustainable” policies cannot focus only on one of the aims. [Read more ...](#)

Innovationsreport 2019

Wissenschaftliche Studie zur Versorgung mit innovativen Arzneimitteln –
Eine Analyse von Evidenz und Effizienz

Gerd Glaeske, Wolf Gierler, Ludwig
Erhardt mit freundlicher Unterstützung der Techniker Krankenkasse

[The Innovation Report 2019 shows more negative ratings than last year](#)

Study on innovative medicines of the year 2016 in day to day care

In the Innovation Report 2019 under the direction of Prof. Dr. Gerd Glaeske mostly negative assessments were given to the new drugs in a long-term evaluation. 14 of 23 were rated with a red and only five with a green traffic light. This is why about 35% of all medicines had been authorized within accelerated approvals due to often insufficient data, especially regarding the risk. Therefore it is more important to ensure the drug safety than to increase the profit of pharmaceutical companies. The special chapter on immunization and vaccination outlines the current discussions on measles and other vaccines. Moreover it discusses the political project of making measles vaccination compulsory. In the authors opinion this should be the last option.
